

Amit Kumar Baghel

AI Engineer · LLM Application Developer · Automation Engineer

amit.baghel.agra@gmail.com · +91 7017491497 · India · github.com/abaghel06 · linkedin.com/in/abaghel06 · abaghel06.github.io · Open to: On-site, Hybrid, Remote

PROFILE

AI engineer with hands-on delivery of multi-agent LLM applications and 4 years of enterprise automation experience. Built agentic systems using LangGraph, RAG pipelines, and Amazon Bedrock; applied prompt engineering and ReAct-style reasoning to production-ready applications. IBM RAG Specialization (May 2026) and AWS Generative AI Developer (Mar 2026) certified. Enterprise background in data integration, workflow systems, and compliance automation adds systems thinking to AI engineering.

TECHNICAL SKILLS

AI & LLM:	LangChain, LangGraph, RAG, Prompt Engineering, ReAct Framework
Agentic AI:	Multi-Agent Systems, Agentic Workflows, Tool Use, Amazon Bedrock, IBM Watsonx
Vector & Search:	ChromaDB, FAISS, Semantic Search, Embeddings
Cloud:	AWS (Bedrock, S3, Lambda), Microsoft Azure
Programming:	Python, SQL (Oracle), Bash / Shell Scripting
Tools:	FastAPI, Streamlit, Gradio, Docker, Git, REST APIs, Linux
Automation:	Workflow Automation, Data Integration, Process Design

WORK EXPERIENCE

Automation Engineer — Wipro Technologies

Aug 2022 – Present

Client: Citibank | Compliance Automation & Workflow Systems | Delhi-NCR, India

- Designed and delivered a data pipeline integrating two enterprise systems that cut end-to-end process cycle time by 66%; adopted as the standard approach across the client engagement.
- Built workflow automation systems for Citibank's compliance framework, converting manual regulatory processes into auditable, automated pipelines with full approval chain tracking.
- Modelled complex process logic, data structures, and validation rules supporting regulatory auditability across the remediation lifecycle.
- Automated deployment tasks via Bash scripting and implemented governance controls aligned to banking regulatory requirements.

PROJECTS

LoanIQ — Intelligent Loan Approval Assistant

github.com/abaghel06/LoanIQ---Intelligent-Load-Approval-Assistant

Personal | LangGraph · Claude (Anthropic) · FastMCP · FastAPI · Streamlit · Python

- Agentic loan decisioning system using LangGraph orchestration and Claude as the reasoning model via the Model Context Protocol (FastMCP).
- Multi-step agent workflow: document ingestion, credit assessment, policy rule checking, and decision explanation — Streamlit UI backed by a FastAPI service layer.

Revenue Leakage Finder

github.com/abaghel06/revenueLeakageFinder

AWS-Wipro Codeathon (Team) | LangGraph · Amazon Bedrock · FastAPI · Streamlit · PostgreSQL · Docker

- Designed high-level architecture and led AI-assisted development for a billing anomaly detection system built during a competitive hackathon.
- Multi-agent system on Bedrock using LangGraph for ReAct-style reasoning; reconciles billing, CRM, and payment records to surface unbilled usage and pricing errors.

Food Recommendation System

github.com/abaghel06/Food-Recommendation-System

Personal | LangChain · ChromaDB · FAISS · Gradio · Python

- Semantic search engine using vector embeddings and ChromaDB; RAG-based Q&A chatbot over a nutritional knowledge base with source-cited answers via LangChain.

CERTIFICATIONS

RAG for GenAI Applications Specialization	IBM · May 2026
Generative AI Learning Plan – Developers (Partner)	AWS · Mar 2026
Microsoft Certified: Azure Data Fundamentals	Microsoft · Sep 2022
Microsoft Certified: Azure Fundamentals	Microsoft · 2022

EDUCATION

B.Tech – Computer Science Engineering

2019 – 2022

Dr. APJ Abdul Kalam Technical University, Lucknow

Diploma in Engineering

2016 – 2019

Dayalbagh Educational Institute, Agra
